Google Home

Set up with the Google Home app

1 Set up Your Home

If you already have Google Home skip to step 4

1. Create a Google Account- use the QR scan code on front page (if you already have one skip this step)
2. Download the Google Home app on your smart phone device (allow access when asked)
3. Click get started and sign in by choosing your Google Account
4. Click the + Create Home button to create your home profile (New Home Address)
5. Once your new home is set up, choose your home to continue and follow steps in the app

2 Add Your Thermostat

Must be connected to Wifi before you start

1. On the home screen, click the +Add button (bottom right)
2. Click + Device and choose New Device (set up a device page)
3. Choose your new home you created for device setup
4. After your app is finished looking for a device, choose Thermostat (what are you setting up page)
5. Choose Nest Thermostat
6. You'll be required to scan the QR code on your thermostat. This can be found:
 - a. Use side navigation on your thermostat to locate "Account"
 - b. Continue next till you reach 'Select Method'
 - c. Scroll to 'Scan Code' and select
7. Follow steps in app after scanning to finish set-up
